Engage My Customer: Create A Customer Base That You Can Digitally Market to!
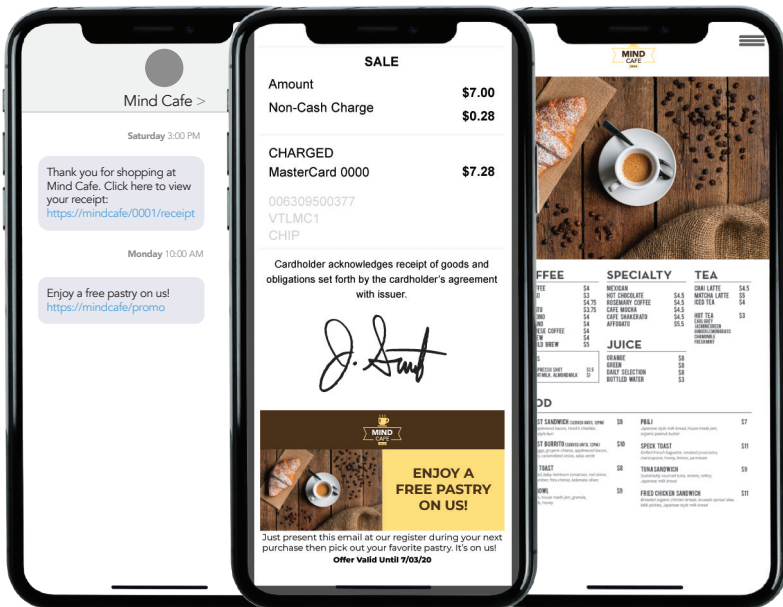

SMS text and email receipts give you the unique opportunity to market your business or sell advertising space on the digital receipts your customers receive. Advertising your website on your digital receipts eliminate the need for food delivery services that take away your profits. Advertising other businesses puts extra income in your pockets.

Using the Engage My Customer feature allows you to analyze feedback, customer spending habits, and patterns to create specific categories of customers that you can create customized SMS marketing to. Customize marketing for VIP customers or reach out to customers who have had a negative experience.
